List of Contents

NUMBER 1

Hamid Alper Oral	1	A crank mechanism with variable radius and phase
B. Posiadała	9	Influence of crane support system on motion of the lifted load
Kuu-young Young and **Chun-Yuh Huang**	21	Collision-free path planning and modification based on task requirements
L. M. Sung and **Y. C. Tsai**	39	A study on the mathematical models and contact ratios of extended cycloid and cycloid bevel gear sets
Massimo Sorli, Carlo Ferraresi, Maja Kolarski, Branislav Borovac and **Miomir Vukobratović**	51	Mechanics of Turin parallel robot
Soumya Bhattacharya, H. Hatwal and **A. Ghosh**	79	An on-line parameter estimation scheme for generalized Stewart platform type parallel manipulators
P. Sardain	91	Linkage synthesis: topology selection fixed by dimensional constraints, study of an example
Tigran F. Parikian	103	Multi-generation of coupler curves of spatial linkages
Gert Bär	111	Curvatures of the enveloped helicoid

NUMBER 2

Chung-Yunn Lin, Chung-Biau Tsay and **Zhang-Hua Fong**	121	Mathematical model of spiral bevel and hypoid gears manufactured by the modified roll method
Faydor L. Litvin and **Pin-Hao Feng**	137	Computerized design, generation, and simulation of meshing of rotors of screw compressor
J. M. Pagalday and **A. Avello**	161	Optimization of multibody dynamics using object oriented programming and a mixed numerical–symbolic penalty formulation
Toshiro Nagashima, Hiroaki Seki and **Masaharu Takano**	175	Analysis and simulation of grasping/manipulation by multi-fingersurface
Harry H. Cheng and **Sean Thompson**	193	Dual iterative displacement analysis of spatial mechanisms using the C^H programming language

Yue Shigang, Yu Yueqing and **Bai Shixian**	209	Flexible rotor beam element for the manipulators with joint and link flexibility
Q. Tu and **J. Rastegar**	221	The effects of the manipulator type on the vibrational excitation during motion
H. H. Hacisalihoğlu and **Rashad A. Abdel-Baky**	235	Holditch's theorem for one-parameter closed motions
A. Sinha, B. J. Gilmore, F. Zhang and **V. Kohli**	241	Efficient computation of the sensitivities of reciprocating engine dynamics to dimensional tolerances
Z. Shi	255	Synthesis of mechanical error in spatial linkages based on reliability concept
Ö. Köse	261	Contributions to the theory of integral invariants of a closed ruled surface

NUMBER 3

Moshe Shoham and **Bernard Roth**	279	Connectivity in open and closed loop robotic mechanisms
Rajiv Dama, Donald A. Streit and **L. Chang**	295	Modeling and analysis of a high-speed transmission with multi-path, elastomeric load-share gears
Hamza Diken	313	Trajectory control of mass balanced manipulators
J. M. Jiménez, G. Álvarez, J. Cardenal and **J. Cuadrado**	323	A simple and general method for kinematic synthesis of spatial mechanisms
V. Abadjiev and **D. Petrova**	343	Testing of the kinematic conjugation of the flanks active surfaces of gear-pairs of type spiroid
Gordon R. Pennock and **John E. Beard**	349	Force analysis of the apex seals in the Wankel rotary compressor including the influence of fluctuations in the crankshaft speed
Carlo Innocenti	363	Analysis of meshing of beveloid gears
Dheeman Basu and **Ashitava Ghosal**	375	Singularity analysis of platform-type multi-loop spatial mechanisms
Gregory L. Long	391	Use of the cylindroid for the singularity analysis of rank 3 robot manipulators
Wang Bin, Li Zhe and **Bai Shi Xian**	405	A new preshaped input function with high robustness for minimizing residual vibration of manipulators
L. Cveticanin	411	A necessary condition for chaos in rotor systems

Book Review
Günter Dittrich 417 Dynamik der Mechanismen. By H. Dresig and I. I. Vul'fson

NUMBER 4

De Lun Wang, Jian Liu and Da Zhun Xiao 419 Kinematic differential geometry of a rigid body in spatial motion—I. A new adjoint approach and instantaneous properties of a point trajectory in spatial kinematics

De Lun Wang, Jian Liu and Da Zhun Xiao 433 Kinematic differential geometry of a rigid body in spatial motion—II. A new adjoint approach and instantaneous properties of a line trajectory in spatial kinematics

De Lun Wang, Jian Liu and Da Zhun Xiao 445 Kinematic differential geometry of a rigid body in spatial motion—III. Distribution of characteristic lines in the moving body in spatial motion

Zhi-Kui Ling and Zeng-Jia Hu 459 Use of swept volumes in the design of interference free spatial mechanisms

A. C. Rao 477 Hamming number technique—I. Further applications

A. C. Rao 489 Hamming number technique—II. Generation of planar kinematic chains

Carlo Innocenti 501 Position analysis in analytical form of the 7-link Assur kinematic chain featuring one ternary link connected to ternary links only

N. S. Vyas, Sidharth and J. S. Rao 511 Dynamic stress analysis and a fracture mechanics approach to life prediction of turbine blades

Phillippe Wenger and Jouad El Omri 529 Comments on "A classification of 3R regional manipulator geometries and singularities"

NUMBER 5

Vladis Kosse 533 Analytical investigation of the change in phase angle between the wave generator and the teeth meshing zone in high-torque mechanical harmonic drives

Alexandru S. Beloiu and Krishna C. Gupta 539 A unified approach for the investigation of branch and circuit defects

Todor Stoilov Todorov 559 Synthesis of Watt's six-link mechanism for manipulation action in relative space

Masahito Yashima and Hiroshi Kimura 569 Planning for manipulating a multiple contacted object by single-prismatic-jointed fingers

J. R. Hewit, J. R. Morris, K. Sato and **F. Ackermann**	583	Active force control of a flexible manipulator by distal feedback
Chih-Hsin Chen	597	Geometro-kinematical analysis of multi-point-conjugation joint
L. Sun, C. G. Liang and **Q. Z. Liao**	609	A reverse static force analysis of a special planar three-spring system
S.-T. Chiou, M.-G. Shieh and **R.-J. Tsai**	617	The two-rotating-mass balancers for partial balancing of spatial mechanisms
S.-T. Chiou and **M.-G. Shieh**	629	The explicit formulae for designing the two-contra-rotating-mass balancers of spatial mechanisms

NUMBER 6

	641	IFToMM Commission A Standards for Terminology: Abbreviations/symbols for terms in TMM
Yu Zhang, Chonggao Liang, J. Duffy and **E. J. F. Primrose**	667	A reverse force analysis of a spatial three-spring system
Zhijia Yang and **J. P. Sadler**	679	Prediction of the dynamic response of flexible manipulators from a modal database
Ismail Murat Ereke	691	Eine untersuchung über die Lenkradschwingungen bei einer Starrvorderachse unter Einfluss der Fahrbahnunebenheiten und der zweispurigen Anregung
Y. B. Zhou, R. Buchal and **F. G. Fenton**	699	Kinematic analysis of the Generalized Clemens Coupling and its variant mechanisms
Fengfeng Xi and **Rosario Sinatra**	715	Effect of dynamic balancing on four-bar linkage vibrations
Glynn P. Adams and **John E. Beard**	729	Comparison of helical and skewed axis gerotor pumps
Kan Cui and **Imtiaz Haque**	743	Symbolic equations of motion for hybrid multibody systems using a matrix–vector formulation
Chih-Hsin Chen	765	Conjugation form of motion representation and its conversion formulas

NUMBER 7

Reşit Soylu and **M. Burak Akbulut**	775	Extraneous roots and kinematic analysis of spatial mechanisms and robots

Yuefa Fang and **Zhen Huang**	789	Kinematics of a three-degree-of-freedom in-parallel actuated manipulator mechanism
Arun Kunjur and **Sundar Krishnamurty**	797	A robust multi-criteria optimization approach
Nicola Pio Belfiore and **Ettore Pennestrì**	811	An atlas of linkage-type robotic grippers
Raafat A. Abou-Elnasr and **Mahmoud A. Moustafa**	835	Performance of an oscillating conveyor driven through a spring
Bert Jüttler	843	An osculating motion with second order contact for spatial Euclidean motions
S. Regnier, F. B. Ouezdou and **P. Bidaud**	855	Distributed method for inverse kinematics of all serial manipulators
J. Kövecses	869	Joint motion dynamics and reaction forces in flexible-link robotic mechanisms
L. Cveticanin	881	Normal modes of vibration for continuous rotors with slow time variable mass

NUMBER 8

Arthur Erdman	893	Obituary: George N. Sandor
Marco Ceccarelli	895	A new 3 D.O.F. spatial parallel mechanism
G. R. Dunlop and **T. P. Jones**	903	Position analysis of a 3-DOF parallel manipulator
Mauro da Lio	921	Robust design of linkages—synthesis by solving non-linear optimization problems
Wen-Jun Zhang	933	On the finding of the spatial linkage with constant pressure angle
J. P. Sadler and **Zhijia Yang**	941	A comprehensive study of modal characteristics of a cylindrical manipulator with both link and joint flexibility
Cheng-Ho Hsu and **Jin-Juh Hsu**	957	An efficient methodology for the structural synthesis of geared kinematic chains
I. A. Parkin	975	Unifying the geometry of finite displacement screws and orthogonal matrix transformations
I. A. Parkin	993	Dual systems of finite displacement screws in the screw triangle

Book Review
Ewald Heer 1005 Progress in Robotics and Intelligent Systems. Edited by G. W. Zobrist and C. Y. Ho

I List of Contents and Author Index for Volume 32 (1997)
